What are the different metal choices?

Jostens offers a variety of metal choices including white and yellow gold, Solaris Elite™, and Yellow Lustrium®.

Gold - Jostens offers gold in 2 colors and 3 karat qualities: **Yellow Gold** - Because of its durability and lasting value over time, gold is a wise investment. Gold has been the standard for jewelry for over 4000 years.

Metal Purities

18K: - 75% pure gold, 25% metal alloy.

14K: - 58.5% pure gold, 41.5% metal alloy.

10K: - 41.7% pure gold, 58.3% metal alloy.

- **Solaris Elite™** - This radiant yellow 6K metal alloy is beautiful and affordable. We've combined durability and affordability to create our exclusive yellow 6K alloy.
- **Yellow Lustrium®** - Lustrium is a non-precious metal alloy that is silver in color. It is a hard and durable metal. Lustrium will react to oxygen and thus may require additional care and cleaning. The Yellow Lustrium metal will be gold in color because of a coating with 23 karat yellow gold.

Installment Plan: Jostens Credit Card Installment Plan allows you to make 4 equal payments on your credit card with no additional interest fees from Jostens. Your first payment will be charged to your credit card upon receipt of order. Successive payments will be charged every 30 days until your payment is complete.

Jostens Payment Plan: \$50 deposit due at time of order. Balance billed in 4 equal monthly installments. A \$15 holding fee will be added to invoice. Ring production begins once 75% of the balance due is paid and generally takes 6 weeks (production time varies). Ring ships only if paid in full. Note: Balance due may be paid in full at any time during the installment process (\$15 holding fee will still be applied).

How to care for your Jostens jewelry

To preserve the beauty and luster of your jewelry, wash with a mild detergent in lukewarm water. Rinse, then dry with a soft, clean cloth. Do not use any type of brush, sharp instrument or rough cloth for cleaning.

For any sterling silver-based products, should your jewelry begin to demonstrate signs of tarnishing, it may be easily removed with a fine brand of silver cleaner applied with a soft cloth. To protect your jewelry from permanent damage, avoid any contact with harsh acids and agents such as chlorine. The effect of harsh acids/agents is permanent. Be sure to remove your jewelry before coming into contact with harsh agents. Some commercial jewelry cleaners may contain these harsh chemicals, use of these products are not recommended.

WARRANTY PROGRAM:

Your ring is automatically protected against theft and loss for **FOUR** years. For an additional \$29.95 plus tax, you can protect your investment for **TEN** years from date of purchase. Offer only available at time of purchase.
